## Retraction Notice

This article has been retracted by the publisher for the following reasons

Retraction of Published Article - "**Comparative Outcome between Adductor Canal Block Versus Periarticular Local Infiltration in Postoperative Total Knee Replacement Analgesia**"

We acknowledge receipt of your request to withdraw the above-mentioned article from our journal. After thorough review and consideration of the reasons provided, we regretfully accept your request for retraction based on the grounds of "conflict of interest" and the unreliable data that has come to light.

In your communication, you have highlighted that a "misexchange of values and data" occurred between the two articles you were concurrently working on, leading to invalid and unreliable data, subsequently affecting the integrity and accuracy of your published work. Given the seriousness of the matter and your commitment to maintaining the highest standards of scientific integrity, we understand your decision to retract the article to prevent the dissemination of incorrect information to the readership.

We appreciate your honesty and transparency in bringing this issue to our attention. Your cooperation in ensuring the quality and credibility of the research published in our journal is highly valued.
